

While it may seem contradictory, it's possible for something to be both easy and difficult. Take business communication. While it has increased in swiftness and ease with online access and delivery, the same access is making it difficult to control overall communication integrity.

Spam now accounts for more than 85% of all email traffic.

- MX LOGIC® THREAT CENTER

30-40% of Internet browsing is non-job related.

- SANS INSTITUTE

“The MX Logic email filtering service blew reviewers away with its simple and comprehensive management interface, high accuracy rates and distinctive features.”

- CRN, APRIL 2008

MX Logic is committed to protecting the communication integrity of today's businesses, ranging from the small to the enterprise. Supporting over 35,000 organizations, we are the largest independent provider of managed email and web security, message archiving and disaster recovery services in the world.

Managed online security is the new defense

Spam is now the foremost delivery mechanism for breeding thousands of forms of destructive malware, while legions of growing online threats are undermining Web-based activity. Add strict electronic security regulations and your business needs complete online protection from MX Logic. A pioneer of messaging security since 2002, MX Logic award-winning managed services are widely recognized for superior protection, fail-proof reliability and overall ease-of-use. Today, we offer a complete suite of online security solutions including:

- MX Logic® Email Defense Service
- MX Logic® Web Defense Service
- MX Logic® Message Archiving
- MX Logic® Disaster Recovery

A future of more secure communications

We recognize that communication integrity does, and will continue to, transcend far beyond email. That's why our industry-leading threat engineers developed ours as a managed Software as a Service model which can be rapidly reprogrammed as new threats are released into the wild and new e-communication policies are issued. With our flexible, future-focused solutions, MX Logic can help your business:

- Reduce business disruption
- Safeguard business communication integrity
- Increase employee productivity
- Increase IT utilization on high-priority development needs and priorities
- Reduce costs associated with Web and email threat management
- More effectively manage email storage and increase compliance with eDiscovery regulations
- Eliminate online security capital expenditures

Advanced technology backed by expert support

Powered by patented technology, MX Logic services provide multiple, dynamic layers of anti-virus and anti-spam protection in a single solution, while our disaster recovery services and message archiving are developed on a highly-sophisticated technology platform made easy for general staff and IT administrators to manage. In addition:

- All services are monitored and updated 24x7 by highly-skilled threat experts in the MX Logic® Threat Operation Center
- Our customers receive peace of mind knowing that a US-based support staff is available by phone or Web 24x7, 365 days a year
- Our technical support is always free

Confidence and ease by design

You can feel more confident that your business email and communication integrity is protected with the MX Logic Threat Center at the core of your service. Our threat center technologists monitor the global state of email and Web traffic around the clock – providing a dynamic, proactive defense. Easy to administer and affordable, MX Logic:

- Offers straight forward month-to-month contracts
- Prices its services based on the number of employees using it
- Requires no set-up fees, costly hardware or software installations
- Is an established, privately-held company with worldwide headquarters in Englewood, CO and several offices and facilities nationwide

For more information about MX Logic, our extensive, prominent customer base, and the time-saving, productivity, and security benefits of our offerings, call 1.877.MXLOGIC or visit us at www.mxlogic.com.

MX Logic® Email Defense Service

Protects your organization from spam, viruses and worms, email attacks and fraud, while enabling ongoing communications during server outages.

MX Logic® Web Defense Service

Works outside the network perimeter to ward off spyware and viruses, while enabling you greater control over non-business-related Internet use.

MX Logic® Message Archiving

Provides the industry's safest and most reliable email archiving and retrieval capabilities, and integrates seamlessly with our comprehensive and easy-to-use Web-based administrative console.

MX Logic® Disaster Recovery Service

Protects against message loss during planned or unplanned email outages and offers the ability to stay connected via Web-based email access, management and use.
